EDUCATION

Year	Degree / Exam	Institute	CGPA / Marks
2024 - 2028	B.Tech - Mathematics and Computer Science	IILM University, Greater Noida	8.54 / 10

RESEARCH EXPERIENCE

Undergraduate Researcher | IILM University, School of CSE Jan 2025 - Present

Supervisor: Prof. Swati Vashisht | Project: Intelligent Nutrient Deficiency Analysis for Precision Agriculture

- Engineered EfficientNet-B3 with SE+CBAM dual-attention; **94.05%** accuracy, **96.49%** precision across **7** classes on **14,000+** images.
- Implemented Grad-CAM XAI heatmaps and automated fertilizer prescriptions via Flask app for real-time farmer diagnosis.
- Conducted comparative CNN analysis showing EfficientNet-B3 outperforms ResNet-50 and VGG-16 by **6%+** in F1-Macro score.

EXPERIENCE

Tech Lead | Beyond Career Jul 2025 - Present

- Architected beyondcareer.online on Next.js, Node.js, and Gemini API with personalised AI career roadmaps and skill gap analysis.
- Engineered a RAG pipeline with FAISS vector search; achieved **sub-2s** LLM response times and **40%** reduction in irrelevant results.
- Led a **5-member** team cutting deployment cycle time by **30%** via Git, Docker, and CI/CD; shipped **3** major feature releases.
- Drove product quality through structured code reviews, sprint planning, and cross-functional technical strategy.

Founder's Office Intern | Lawxygen Feb 2026 - Present

- Built AI document automation using LLM workflows and NLP, cutting manual legal processing time by **60%** per document batch.
- Contributed to system architecture and technical roadmap, bridging ML research with real-world legaltech product delivery.
- Collaborated directly with founders on product strategy and execution, bridging tech and business to build scalable internal tools.

COO, Frontend Developer and Graphic Designer | SGCA Technologies Pvt. Ltd. Dec 2023 - Jun 2025

- Managed a **10-member** team across **10+** builds; cut delivery timelines by **25%** and UI dev time by **35%** via reusable React.js libraries.
- Designed end-to-end UI/UX assets and brand design systems; translated Figma mockups into responsive, production-ready code.

App Developer | PW (PhysicsWallah) Dec 2024 - Mar 2025

- Developed Flutter and Dart features for a **100M+** user ed-tech platform; all sprints delivered ahead of schedule with full coverage.
- Collaborated in an agile team, consistently meeting sprint deadlines and contributing to user-facing feature releases.

PROJECTS

NutriScan AI | Python, TensorFlow, EfficientNet-B3, Computer Vision, Deep Learning, Flask, Grad-CAM |

github.com/Aanya019-coder/Intelligent-nutrient-deficiency-analysis-for-precision-agriculture-using-ai

- Designed a **7-class** crop deficiency model (EfficientNet-B3 + dual-attention); **94.05%** accuracy, **93.22%** F1-Macro on **14,000+** images.
- Integrated Grad-CAM XAI heatmaps for visual crop diagnosis; automated fertilizer prescriptions via Flask with real-time inference.
- Ran comparative CNN benchmarking (ResNet-50, VGG-16, EfficientNet-B3); outperforms baselines by **6%+** in F1-Macro score.
- Published as undergraduate research under Prof. Swati Vashisht; covers N, P, K, Fe, Zn, Mg deficiencies across **4** crop types.

AI Career Guidance Platform | Next.js, Node.js, Gemini API, RAG, FAISS, PostgreSQL | [beyondcareer.online](#)

- Deployed a full-stack AI platform (RAG + FAISS) with personalised career roadmaps and skill gap analysis in under **2** seconds.
- Integrated authentication, analytics dashboards, and real-time feedback loops; **3** major releases driven by live user behaviour.
- Built PostgreSQL-backed user profiles with personalised skill gap scoring and dynamic roadmap generation per career goal.
- Architected CI/CD pipelines on Vercel; cut deployment time by **30%** with zero-downtime production deployments throughout.

AI Resume Analyzer | FastAPI, React.js, OpenAI API, NLP, Prompt Engineering | [Github](#)

- Developed an NLP pipeline generating ATS scores and keyword gap reports via structured LLM output with strict JSON schema.
- Parses job descriptions and resumes to generate ATS scores and keyword gap reports with role-specific actionable feedback.
- Built a React.js frontend with FastAPI backend; file upload, real-time scoring, and downloadable reports in one SPA.
- Designed prompt engineering templates for structured OpenAI API output; strict JSON schema for consistent, reliable parse results.

SKILLS

Languages: Python, JavaScript (ES6+), C++, SQL, HTML5, CSS3, Dart

Frameworks: React.js, Next.js, Node.js, Express.js, Flutter, FastAPI, LangChain

AI and ML: Machine Learning, Deep Learning, LLMs, RAG, FAISS, Computer Vision, NLP, Prompt Engineering, Scikit-learn, TensorFlow

Databases: PostgreSQL, MySQL, MongoDB, Firebase

Tools: Git, Docker, CI/CD, Figma, Vercel, AWS, REST APIs, Linux, Postman

Certifications: Google AI Essentials, AWS Generative AI Foundations, Google Prompting Essentials, Data Analyst in Python

ACHIEVEMENTS AND LEADERSHIP

- Serving as Vice President of Tech Spark (coding club, IILM University), leading technical initiatives and student community growth.
- Organised Tech Treasure Hunt (twice) and Prompt-a-thon at Ignite Tech Fest, coordinating **300+** participants across both events.
- Represented IILM University at inter-college tech events, showcasing AI/ML projects and fostering cross-campus collaboration.
